Knowledge and creativity
give us the energy

to solve any challenge

SCAN ONE is a professional planner, developer and facilitator of social and skill building events.

Since we started up in 1997 we have assisted companies and organisations with creative input, quality assurance and the expert facilitation of events such as conferences, themed and specialized excursions, incentives, team-buildings, client events and kickoff.

COMMITTED When it comes to process and facilitation we focus as much on the whole as on the details. Our commitment extends from the very first idea to the completed event.

We take care of all aspects of event management so that you can concentrate on your clients or employees and the purpose of your event. Taking advantage of our expertise gives you the time to focus on your guests or colleagues.

UPDATED Our extensive expertise and experience are vital launching pads, but corporate development is our real strength. At Scan One we focus continuously on keeping in step with the trends, new products and relevant changes happening around us.

Our clients are entitled to expect optimal solutions to the challenges they face – your vision of quality is important to us.

QUALIFIED Scan One can help you with consultancy, training and presentations tailor-made to suit your company. Our knowledge of the market and an extensive network of professionals enable us to find the right person to meet your needs.

Together with CTS-Setting, we offer specialized expertise in corporate development and performance training.

We cover topics such as communication, sales training, strategy, presentation techniques, performance goal achievement, corporate tribal culture, motivation, trend presentations and market consultancy.
